principal that the university exists for the benefit of students past, present and future. It has no religious or ecclesiastical character. The greatest need of the student is the material. Mr. Stanford said, "Ample endowment may not procure large income, students may present themselves in numbers, but in the end the faculty insures or marks the university."

"In its public relations," Prof. Jordan added, "the university stands for infinite patience, for constant testing of ideas and ideals. It conducts no propaganda, it controls no affairs of business or public action."

EPIDEMICS OF SUICIDE IN NORTHERN TOWNS.

FIVE DESPONDENT MEN FIND RELIEF IN DEATH.

Vagrants Hang Themselves in Jails at Fresno and Redwood City—Robert Rasmussen Ends His Sickness by the Revolver Route.

BY THE NEW ASSOCIATED PRESS—A.M.J.

FRESNO, May 29.—J. H. Witt, who was in jail for vagrancy, hanged himself this morning at 4 o'clock with a piece of wire. Witt, a vagrant, was in the vault safe in what was formerly the Tax Collector's office in the basement of the County Courthouse, but is used as a temporary place of detention while the jail is undergoing reconstruction.

Witt formerly lived at Visalia. The last time he was in jail he was a morphine fiend.

SAN FRANCISCO, May 29.—Robert Rasmussen, a man who had missed the election, gave orders to Dewan and Leib to fire the blast and proceed with the drilling in the locality, which is to the left of the 700-foot level.

The men worked an air drill from 11 o'clock and then the explosion occurred. It is not known whether the two men had any hand in the explosion, but there was only one, or if the two men had been in the blast.

It is believed that the blast was caused by contact of the drill.

HEALTHY WOMEN.
Mary Kennedy, manager of Arms & Co's Exhibit at the Trans-Mississippi Exposition at Omaha, Neb., writes the following of Parsons, as a cure for the common plagues of summer: "I found the change of air incidental to eight years of traveling completely upon my digestive system, consulting several physicians they decided I suffered with asthma of the stomach. Their prescriptions did not seem to help me any, so I tried to get a cure at Parsons, and soon found myself well repaid."

"I found the change of air incidental to eight years of traveling completely upon my digestive system, consulting several physicians they decided I suffered with asthma of the stomach."

"Their prescriptions did not seem to help me any, so I tried to get a cure at Parsons, and soon found myself well repaid."

"I have now used Parsons for about three months and feel strong, am very repaid. I believe I am perfectly cured, and do not hesitate to give unqualified praise to your great remedy Parsons."

"The cures of summer cataract, second, derangements of the stomach and liver; third, impure blood. Stock being the case, any one who knows anything whatever about the operations of Parsons can understand why this remedy is a permanent one for health. It eradicates cataract from the eyes, cures the stomach and liver, cures the blood of all impurities, and cures permanently cures of rheumatic pains—the host of maladies peculiar to women. The cause being removed, the symptoms disappear. The remedy results from the use of Parsons, at once to Dr. Hartman, giving full statement of your case, and we'll be pleased to give you his valuable advice."

Address Dr. Hartman, President of Hartman Sanitarium, Columbus, Ohio.

"DINE AND SLEEP."

King Edward's Invitation to His Subjects to Silence Any Possible Cause of Neglect on the Continent.

THE ASSOCIATED PRESS—MAY 29.—Lord Milner, the British ambassador to France, says that his government has emphasized a unique distinction in his welcome to Lord Milner giving to him a "dine and sleep" invitation to Windsor. Lord Milner has been invited by the royal family, having been put in a position for graciously declining invitations to dinners which are offered to him from every part of the United Kingdom and the Colonies, when there have silenced any outburst which might have been raised against the government.

Gen. Lorne-Campbell, the British commander here, says the international situation at Tien-Tsin is better than at any time since the arrival of British troops, upon the departure of the Americans the Russians objected to the British hoisting their flags on a hotel where the American flag was taken down. But Gen. Wogack, the Russian commander, withdrew his objections.

Under the W.H.P.

CHINA MUST PAY PROMPTLY.

BY THE NEW ASSOCIATED PRESS—M.J.

WASHINGTON, May 29.—The Department of State has been informed reliably that the Chinese government has issued an order agreeing to pay an indemnity of \$50,000,000 to the United States, equivalent to about \$257,000,000 at the present rate of exchange. It is known now that the whole subject of indemnity will be closed up before the end of the present month. If that is not done and evacuation is not made on a large scale, the Chinese government must be assessed \$1,000,000 each day after June 1 next, to compensate the power for the maintenance of this military force in China. Under this whip the Chinese government has been forced to yield. It is not known that the power have agreed to pay the indemnity, but now that the amount of indemnity is fixed, not much difficulty is expected on this score.

The United States government has not taken part in the selection of a military commandant to succeed Field Marshal Count Von Waldersee from the commandant at Peking. Having dispensed with our military force in China, the United States is not concerned with the commandant of the military force in China. Under this whip the Chinese government has been forced to yield. It is not known that the power have agreed to pay the indemnity, but now that the amount of indemnity is fixed, not much difficulty is expected on this score.

Germany's Surrender.

ALL POWERS AGREE TO IT.

BY THE NEW ASSOCIATED PRESS—M.J.

BERLIN, May 29.—[By Atlantic Cable.] The correspondent of the Associated Press learns authoritatively that all the powers have accepted Germany's proposition to withdraw Field Marshal Count Von Waldersee from China and surrender the chief command.

In German circles, the British proposition that China pay the indemnity by issuing bonds, making the interest and sinking fund payments yearly thereon, is now regarded as certain of being accepted. Whether the acceptance will be unanimous.

Germany's contingent remaining in P. Chi Li, it is learned on authority, will be sent to the capital. The troops are delaying there as a guarantee of the fulfillment of the peace conditions.

International Polo Matches.

NEW YORK, May 29.—A cablegram has been received by James R. Keene, father of son, Foxhall P. Keene, who is to travel to China, indicating that the latter has practically completed arrangements for the proposed international polo matches between picked teams of Great Britain and America. The contests will probably be played late in July at Hurlingham. The trophy will be the cup won two seasons ago at Newport by the English team.

EST WE FORGET.

Memorial day brings with it duties which the people of this republic, especially those of the younger generation, do not, in these later days, sufficiently appreciate. This day differs widely in character from any other American holiday. The spirit of all our other holidays, the Fourth of July, Christmas, New Years, Thanksgiving day, is joyous; that of Memorial day is serious. The other days are properly the occasion for sports and various festivities. Not so, however, with this day. Memorial day, as its name implies, is set apart for the distinct purpose of recalling the memory of the brave and loyal men who offered their lives as a sacrifice for their country and are now sleeping in the "bivouac of the dead." Anything like frivolity or pleasure-seeking, therefore, does violence to the serious and holy purpose to which the day is dedicated. Any public indulgence of this kind, though it may not be so intentionally, is evidence of a lack of proper respect for the heroic dead, and for their friends and former comrades who survive them.

It is too much to ask that one day of the 365 in the year be given to the recalling of the memories of our brave, self-sacrificing dead, and of bestowing upon their resting places the tokens of our love and respect? No more effective lesson in patriotism can be instilled into the minds of the young than that which must impress itself upon them by a proper observance of this day. It is the day of all days that teaches the estimable price that patriots place upon their country's integrity and their country's honor. Let us not, therefore, forget its serious and sacred import. Let us not commit the sacrilege of violating its sanctity with occupations not consistent with its true spirit. On the contrary, let us so improve it that we shall do our part in carrying into effect the spirit of the words of the immortal Lincoln at Gettysburg, "that from these honored dead we take increased devotion to that cause for which they gave the last full measure of devotion; that we highly resolve that these dead shall not have died in vain . . . and that government of the people, by the people, and for the people, shall not perish from the earth."

CUBA'S ACCEPTANCE.
At last the Cuban mountain, after long and sore travail, has brought forth a mouse. The constitutional convention, by a majority of one vote, has "accepted" the Platt amendment, defining the conditions requisite to the withdrawal of our forces from the island. Now that the Platt amendment has been formally accepted, the affairs of the universe can probably go on in a normal manner.

The fierce discussion which has been going on in the Cuban convention over this question for months past has been productive of a great deal of disgust in the United States and elsewhere. The Platt amendment proposes nothing that the Cubans should not be willing to accede to without question or protest. The provisions which have met with the most determined opposition from the callow statesmen of the island were inserted chiefly for the benefit of the Cuban themselves, and are necessary to the preservation of the very independence of which they are so fond of prating, but which they are utterly unable to maintain without the assistance of the power which liberated them from Spain. Instead of a begrimed majority of one in favor of the Platt amendment, the Cuban convention, if its delegates had been possessed of anything like genuine gratitude toward the great republic to which Cuba owes so much, would have adopted that measure unanimously and by acclamation.

In the discussion preceding the final vote on the amendment, Señor Tamayo vindictively declared that every body who voted in favor of the Platt amendment was a traitor to his cause. This malicious and silly statement the convention compelled Señor Tamayo to retract, to its credit it is said. Señor Gomez (not Gen. Maximo Gomez) in the course of a long harangue rehearsed the Cubans' fight for independence, and denounced as perfurers all who favored the Platt amendment.

Some wore the Blue—the victors were they, Standing for Union and right!

Brave, but mistaken in light.
Fought are their battles—freedom was won;
Waves not the Flag over slaves!
Heroes shed blood and Flag there is one;

trado system of Weyler, when the American forces first set foot upon Cuban soil.

If the United States had held aloof from Cuba, instead of driving Spain out of the island, there would have been no constitutional convention, and Señors Gomez and Tamayo would have had no opportunity to vent their spleen in public against the benefactors of their country. They would probably not be alive today if we had kept out of Cuba; for Weyler had been upon a deliberate scheme of extermination, and he was in a position to carry out his schemes to the letter.

Our intervention in Cuba has involved a tremendous sacrifice, in money and in human lives which are far more precious than money. These rabid Cubans who cry out against our eminently just and reasonable demands seem never to take into account these unprecedented sacrifices which we have made—and are still making—in their behalf. If the Cubans had been left to themselves, even after the Spaniards had been driven from the island, they would have retrograded instead of making progress, and it is more than doubtful whether they would ever have been able to form a stable government for themselves.

The success achieved and the progress made in Cuba under the American regime are the wonder of the world. The London Post voices a sentiment which is quite generally prevalent in well-informed circles, outside of the United States, when it says that "the experience of Havana, during the first year and a half of American supervision, proves that a government under the authority of an American executive would be incomparably better than anything that Spain had been able to give, and than anything that the Cubans could create for themselves."

But we have no intention of imposing or forcing upon the Cubans an American executive in perpetuity. They are to be left to work out their destiny in their own way, so soon as we can withdraw our forces without danger of having the good work which we have accomplished undone, so that we should be compelled to do it all over again, in self-protection and for the protection of the Cubans against themselves if not against a foreign foe. The Platt amendment is a step in the direction of American retirement from Cuba. It is well for the Cubans that they have accepted the amendment, even though it be by so small a majority as one vote. The acceptance of the amendment, it is to be hoped, will put a stop to further quibbling on that score, and thus will serve to hasten in no small degree the solution of the Cuban problem.

The Supreme Court's decision is as complete a vindication of the administration and its methods as could be desired or expected. In the course of time it will appear clearly and unmistakably that this decision, like the course pursued by the administration, makes for liberty, justice and progress.

THE OIL FIELDS MEETING OF PRODUCERS.

General Conference Set for Saturday.

Oil Prices Not Yet on the Wing.

Southern Gushers—Summerland Refinery to Make Liquid Asphalt Only.

A general meeting of local well owners has been called by the Membership Committee of the Producers' Association for next Saturday evening.

At the first conference of the committee held yesterday morning it was ascertained that gratifying progress has been made in securing signatures to the agreement of the proposed combination. The meeting was not now conversant with the general plan of organization, many misinterpreting the announcements that have been sent out.

In order that the scheme may be presented to all those who wish to become informed, an invitation has been extended for a general meeting, this being arranged as the quickest way to bring the matter to a head. It will be held at the same place, the hall in the Tajo building, which is now being fitted up ready for business, and it is anticipated a large representation will be on hand.

MARKET'S CONDITION.

While there has been a noticeable tightening of the local oil market for several days in anticipation of the new combine entering the field, it is evident that those who expect an early advance in the value of the product are destined to disappointment.

It is the combine will work for better prices, but it is announced by the directors of the association that they have no intention of sowing for others' rats. Unless considerably more than 50 per cent of the oil produced is signed up, the combine will confine its attention first to the marketing and handling of the oil, securing a better price for handling, before an attempt will be made to sell a new market value. In the item of hauling alone it is believed many thousands of dollars yearly could be saved.

If, however, the association is successful in securing more than a commanding per cent. of the output, combining with the oil will be a good product.

The Carmelita Oil Company has not been so fortunate in its attempt to find oil. Its drill has been sent in 1200 feet, but it has not yet been able to find oil in any quantity.

After some delay it is announced the Mexican Crude has commenced work on the well.

The drill in Well No. 1 of the Golden State Company has eaten its way to sand, and the hole will be finished this week.

With over forty feet of black shale streaked with asphalt and a slight showing of oil, the Producers' Guarantee Co. is confident of success. The indications are that the oil will be ready for the pump by the first of next week.

The Esperanza has finished its Ricketts well, and will be at work by the end of the week.

The Union Consolidated Crude has several rigs at work. In a well being deepened on what was formally the Yukon plant, the drill has dropped down into the sand.

On the well a team job obtained in possession of a new fifty-barrel well, completed this week. The drill was sent in to the second sand and making a hole 1200 feet deep.

When the pump was started it was about a fifty-barrel production. The hole is near the corner of College and Yale streets, where another well will be started.
